

## Product Data Sheet

# NewPro Microfibre Cleaning-Cloth for Glass & Windows

NewPro Microfibre Cleaning for Glass & Windows is a new generation of microfibre because it cleans without streaks or polishing.

Please, take note of the following information in order to achieve optimal cleaning results and the longest possible durability of the cloth.

Due to its special structure, the cloth even removes greasy dust. It can be used for all smooth surfaces.

### **Cleaning without streaks and no polishing!**

For correct use please follow these steps:

- Before first use, the NewPro Cleaning – Cloth should be washed for about 10 to 15 minutes under clear water.
- Do not use any chemical cleaning products. The cloth is to be used with pure water only. This saves money and protects the environment.
- The NewPro Cleaning – Cloth is to be wrung carefully before use. The dryer the cloth the better for the cleaning results (slightly damp).

We recommend to fold and re-fold the cloth several times during cleaning to guarantee good results. Always use a clean part of the cloth. After cleaning the areas dry it will be required without streaks and polishing.

### **IMPORTANT ADVICE**

- The NewPro Microfibre Glass & Windows cloth can be washed up to 90°C
- Do not use any softener or conditioner.
- Do not use a dryer.
