

Product Data Sheet

NewPro Hoses for potable water / drinking water

Product Description

NewPro offers special plastics and thermo-sets intended for the contact with potable water or foodstuffs. A focus is distributing hoses for the transport of potable water with remarkable characteristics.

Range of application

Installation for drinking water, vehicles, boats, ships, and airplanes.

Potable water certificate according to German KTW range A (pipes and hoses with $D < 80$ mm) for cold, warm and hot water including a certificate in accordance to DVGW technical rule W 270.

Very lightweight (about 25% lower weight than common hoses) smooth surface leading to high throughput easy to clean.

The hoses are used as inliners in armoured hoses (pressure resistant flexible hoses in accordance to DVGW technical rule W 543), for the drinking water supply in vehicles and for mobile purposes or for bottling of beverages like juices or beer.
